

'Mini Vault' Series Safe Installation Instructions

The Securikey 'Mini Vault' series of Safes are designed to be positioned and secured to either wall or floor using the frame fixings provided. Fixing position within safe varies dependant upon safe model. To provide maximum security, fasten the safe to solid building materials with the fixings provided.

Please read all instructions before commencing installation!

- Ensure surface where the safe is to be fitted is level.
- Using the safe as a template, mark fixing positions on surface to be drilled.
- Ensure that full access to the safe will be possible when mounted in this position.
- Using an 11mm drill bit, drill holes and insert an expansion plug into each hole.
- Reposition safe, insert frame fixings and tighten as necessary.
